COMPEX

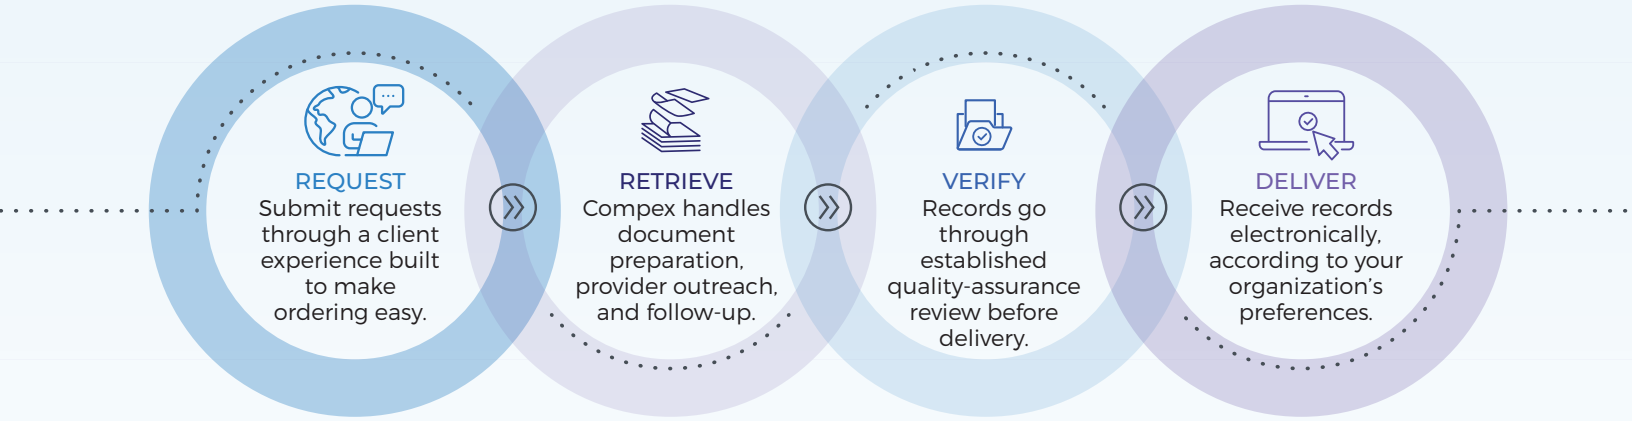
Record Retrieval

Retrieving records means navigating different providers, jurisdictions, requirements, and timelines, then following up until the right records arrive. Compex manages that work from request through delivery, giving your team visibility along the way without the administrative burden.

50 states nationwide coverage | **50+ years** records expertise

One workflow from request through delivery

How it works



Why Compex?

Nationwide reach. Local know-how.

Requirements vary by provider, jurisdiction, and request type. With coverage in all 50 states and more than five decades of experience, Compex has the knowledge and infrastructure to work through those differences at scale.

Visibility without the follow-up.

The Compex Client Portal is one place to order, track, and receive records, while Compex manages the work behind the scenes.

Built around your workflow.

Compex supports individual matters and high-volume programs, with flexible workflows, direct billing where carrier arrangements allow, and experienced client service teams who keep requests moving.

More than medical records.

Retrieval covers medical, billing, workers' compensation, insurance, employment, accident, school, and other case-related records, as well as X-rays and diagnostic images.
