

Asabell Case Summary

Bring the complete medical story together.

Asabell™ from Compex transforms complex medical records into structured medical records intelligence. The latest release of Asabell Case Summary brings that intelligence together across the complete record set, giving reviewers a single, organized view of the medical story.

Every record Asabell processes feeds a single case-level document that stays current as new records arrive.

When the record set is ready for review, Asabell consolidates every provider, every date of service, and every bill into one structured, reviewer-ready document. Instead of reconstructing the medical story by hand from thousands of pages, your team opens a single view of the case.

What's in a Case Summary

-  Plain-language case narrative
-  Chronology of care across all providers and dates
-  Key diagnoses and treatment
-  Organized provider views
-  Billing and medical expense context
-  Evidence citations for verification

COMPLEX

CASE OVERVIEW

Sam Pheidon, a 25-year-old, was the restrained driver of a 2019 Honda Accord involved in a motor vehicle accident on 07/01/2023, when the vehicle was struck from behind by a 2020 Ford F-150 traveling approximately 35 mph. Over 44 months (07/01/2023 to 05/21/2024), Sam treated with 7 providers, totaling 20 visits. The patient's medical history includes two prior motor vehicle accidents (10/15/2022 and 10/01/2022) with traumatic injuries and a subsequent digital accident (11/11/2023). The MVA charges of \$125,947 comprise the majority of the patient's total billing of \$199,355, with \$73,508 incurred after the primary MVA on 07/01/2023. Treatment modalities included emergency evaluation, diagnostic imaging (16 studies), interventional pain management (2 injections), surgical procedures, and office visits. Cervical spine, neck/shoulder, and other complaints resolved by 01/20/2024, 11/28/2023, 09/27/2023 and 07/24/2024, respectively, while lower back and shoulder complaints remain under treatment. The digital on 11/11/2023 introduced new spinal pathology (L5-S1 NMP, C5-C6 disc bulge) relevant to causation analysis. Documented pain scores for all body regions are noted. Work status included periods of work and ongoing modified duty.

7 PROVIDERS

30 TOTAL VISITS

\$199,355 TOTAL BILLED

44 months TREATMENT DURATION

NOTABLE SIGNALS

- Cervical spine pain improved from 8/10 to 3/10
- Lower back pain improved from 8/10 to 3/10
- Other pain improved from 8/10 to 3/10
- Shoulder pain improved from 8/10 to 3/10

TREATMENT MODALITIES

- Emergency evaluation
- Diagnostic imaging (16 studies)
- Interventional pain management (2 injections)
- Office visits

PRIMARY DIAGNOSES

- Spain of Ligaments of Cervical Spine (SIC 840.00)
- Neck/shoulder pain (SIC 840.00)
- Interventions Dis. Degeneration, Lumbar Region (S4 1.0)
- Neck/shoulder pain (SIC 840.00)
- Low Back Pain with Radiculopathy (SIC 840.00)
- Complex Head/Neck Pain, Right Shoulder (SIC 840.00)

KEY DIAGNOSTIC PROCEDURES

- MRI Cervical Spine (CPT 72141)
- MRI Lumbar Spine without Contrast (CPT 72148)
- MRI Cervical Spine (CPT 72141)
- MRI Lumbar Spine (CPT 72148)
- MRI Right Shoulder (CPT 73031)
- MRI Right Shoulder (CPT 73031)

MEDICATIONS PRESCRIBED

- Hydrocodone Bitartrate
- Gabapentin 300 mg
- Discontinuation of Acetaminophen 325 mg
- Celecoxib 200 mg
- Meloxicam 7.5 mg

From thousands of pages to a case you can read
Case Summary organizes the full record set into a document your team can read, verify, and act on. That means faster review, more consistent analysis across cases, and findings that stay connected to the underlying records for defensibility.

How it fits your workflow
Built on more than 50 years of medical record expertise, Asabell extends Compex's trusted retrieval workflow with AI-powered medical record intelligence. Case Summary is created as part of the existing process, no separate AI vendor, no disconnected upload process, and no change to how your team works. Reviewers receive an organized companion PDF, typically the same day the record set is delivered.
